July 20, 2023

Mr. Radovan Drinka
Global Head of Tropical Cyclone Model Development
Impact Forecasting
200 East Randolph Street
Chicago, IL 60601

Dear Mr. Drinka,

This will confirm the finding of the Florida Commission on Hurricane Loss Projection Methodology on July 20, 2023, that the Impact Forecasting model has been determined acceptable for projecting hurricane loss costs and hurricane probable maximum loss levels for residential rate filings. The determination of acceptability expires on November 1, 2025.

The Commission has determined that Atlantic Tropical Cyclone – Wind (FCHLPM) Model Version 2.0 on ELEMENTS Version 17.0 (*primary platform*), limited to the specific options acceptable for use in a Florida rate filing identified in Hurricane Standard A-1, Hurricane Modeling Input Data and Output Reports, Disclosure 6, and as selected in the input form provided in Disclosure 4, and reported in the output form provided in Disclosure 5:

- a. complies with the hurricane standards adopted by the Commission on October 26 & 27, 2021, and

Mr. Radovan Drinka
Impact Forecasting
July 20, 2023
Page Two

- b. is sufficiently accurate and reliable for projecting hurricane loss costs and hurricane probable maximum loss levels for residential property in Florida.

On behalf of the Commission, I congratulate you and your colleagues. We appreciate your participation and input in this process.

Sincerely,

A handwritten signature in black ink, appearing to read "Floyd Yager", with a stylized flourish at the end.

Floyd Yager, Chair
Florida Commission on Hurricane Loss Projection Methodology
